Portfolio: lbakerdev.github.io

Senior Frontend Engineer

8+ years building React and TypeScript applications for enterprise and startup products, specializing in analytics dashboards and data visualization. Led a frontend team in a cross-functional Mailchimp initiative serving 2.4M monthly users. Finance and insurance background adds business context to data-heavy products.

WORK EXPERIENCE

Intuit Mailchimp
04/2024 - 08/2026

Software Engineer

- Owned frontend for Email, SMS, and WhatsApp reporting serving 2.4M monthly users (React, TypeScript, GraphQL).
- Led a 3-engineer frontend team in a cross-functional WhatsApp initiative, partnering with product, design, and backend to move 5 reporting surfaces to GraphQL.
- Spearheaded SMS recipient reporting, streaming delivery and engagement metrics in near real time and cutting latency from hours to minutes.
- Built the homepage Marketing Snapshot widget with a partner team on Intuit's App Fabric micro-frontend platform, surfacing engagement and attributed revenue metrics.
- Migrated 3 Audience Analytics components to GraphQL and built their Playwright E2E suite.

Cognizant (Client: Nationwide Insurance)
Remote • 12/2021 - 04/2024

Senior Consultant

- Led development of an enterprise SharePoint search application built with React, TypeScript, SASS, and Node.js.
- Redesigned the company-wide employee hub used by 30k+ employees, with custom UI components and Docker deployment.
- Implemented SSO with JSON Web Tokens and Microsoft Azure.

CapTech Consulting
Remote • 09/2020 - 10/2021

Senior Consultant

- Overhauled a legacy portal for a Fortune 100 insurance company using Angular, redesigning the site's look and feel in close partnership with design and product.
- Streamlined a B2B e-commerce site with React, TypeScript, and Redux, improving page load times by 15%.

Buckle (Insurtech Startup) 10/2019 - 09/2020

Frontend Engineer

- Shipped 2 customer-facing frontend portals for an insurtech product launch.
- Revamped user onboarding and account management flows, driving a 30% lift in customer satisfaction.
- Established code review practices that cut bug rates by 25%.

LivePerson 04/2019 - 10/2019

Frontend Engineer (Contract)

- Built features for the company's core chat application in Vue.js and Node.js.
- Developed a reporting dashboard with reactive D3.js charts for the web-based chat platform.
- Implemented WebSocket connections for real-time chat between agents and customers.

Client Command 03/2018 - 04/2019

Frontend Engineer

- Partnered with backend engineers to migrate a client-facing Angular app to serverless AWS.
- Rebuilt all pages as responsive layouts using TypeScript, flexbox, and Angular fx-layout.
