Senior Software Engineer

Software engineer with 8+ years specializing in frontend, building React, TypeScript, and Node.js applications. Focused on analytics dashboards, data visualization, and design systems for enterprise and startup products, with measurable gains in performance and quality.

WORK EXPERIENCE

Intuit Mailchimp

Atlanta, GA • 04/2024 - 08/2026

Software Engineer

- Led 3 engineers across 4 partner teams to launch 5 WhatsApp reporting pages on GraphQL.
- Owned the email, SMS, and WhatsApp reporting frontend (6+ reports) on a platform with 2.4M monthly users (React, TypeScript, GraphQL).
- Rebuilt SMS reporting on a new StarRocks-backed endpoint, structuring the frontend data schema for near-real-time metrics and cutting latency from hours to under 5 minutes.
- Built the homepage Marketing Snapshot widget on Intuit's App Fabric micro-frontends, surfacing engagement and revenue metrics to 1.1M monthly users.
- Built reusable Audience Analytics visualization components and a Playwright suite covering critical paths, catching regressions before release.

Cognizant (Client: Nationwide Insurance)

Remote • 12/2021 - 04/2024

Senior Consultant

- Led development of an enterprise SharePoint search application built with React, TypeScript, SASS, and Node.js.
- Redesigned the company-wide employee information hub used by 30k+ employees; built with React, TypeScript, SASS, and custom UI components, packaged in Docker.
- Implemented secure SSO using JSON Web Tokens and Microsoft Azure.

CapTech Consulting

Remote • 09/2020 - 10/2021

Senior Consultant

- Overhauled a legacy portal for a Fortune 100 insurance company using Angular, redesigning the site's look and feel in close partnership with design and product.
- Streamlined a B2B e-commerce site in React, TypeScript, and Redux, cutting load times 15%.

Buckle (Fintech Startup)

Atlanta, GA • 10/2019 - 09/2020

Frontend Engineer

- Shipped two customer-facing frontend portals for a fintech product launch.
- Revamped onboarding and account flows, driving a 30% lift in customer satisfaction.
- Established rigorous code reviews, lowering bug rates by 25%.

LivePerson Atlanta, GA • 04/2019 - 10/2019

Frontend Engineer

- Developed and maintained the company's core chat application in Vue.js and Node.js.
- Built a reporting dashboard with reactive D3.js charts for the web-based chat platform.
- Implemented WebSocket connections for real-time chat between agents and customers.

Client Command Atlanta, GA • 03/2018 - 04/2019

Frontend Engineer

- Owned maintenance and deployment of a client-facing Angular app (TypeScript, Node.js, Webpack).
- Converted all application pages to responsive/adaptive layouts using flexbox and Angular fx-layout.
- Refactored the admin section with Angular Material for a consistent, cohesive UI.
- Partnered with backend engineers to migrate the stack to a serverless AWS environment.

EARLY CAREER

State Farm Atlanta, GA • 02/2010 - 03/2016
